

2024 – 2025 Greenhouse Gas Emissions – Scope 3 Categories and Annual Emissions

Details of Indirect Greenhouse Gas Emissions (Categories 3–6, including subcategories)	2024 Emissions (metric tons CO ₂ e)	2025 Emissions (metric tons CO ₂ e)
Category 3: Indirect greenhouse gas emissions from transportation	0.2230 metric tons of CO ₂ e	0.0001 metric tons of CO ₂ e
3.1 Emissions from upstream transportation and distribution	Not significant	Not significant
3.2 Emissions from downstream transportation and distribution	0.2230 metric tons of CO ₂ e	0.0001 metric tons of CO ₂ e
3.3 Emissions from employee commuting	Not significant	Not significant
3.4 Emissions from customer and visitor transportation	Not significant	Not significant
3.5 Emissions from business travel	Not significant	Not significant
Category 4: Indirect greenhouse gas emissions from products used by the organization	257.4869 metric tons of CO ₂ e	349.5923 metric tons of CO ₂ e
4.1 Emissions from purchased goods	257.4869 metric tons of CO ₂ e	349.5923 metric tons of CO ₂ e
4.2 Emissions from capital goods	Not significant	Not significant
4.3 Emissions from treatment of solid and liquid waste	Not significant	Not significant
4.4 Emissions from use of assets	Not significant	Not significant
4.5 Emissions from services not described in the above subcategories	Not significant	Not significant
Category 5: Indirect greenhouse gas emissions from the use of the organization's products	Not significant	Not significant
5.1 Emissions from use or disposal of products	Not significant	Not significant
5.2 Emissions from downstream leased assets	Not significant	Not significant
5.3 Emissions from product end-of-life	Not significant	Not significant
5.4 Emissions from investments	Not significant	Not significant
Category 6: Other indirect greenhouse gas emissions	Not significant	Not significant
